**DETAILED ACTION**

***Response to Election***

1. Upon review the propriety of the previous restriction, the restriction is erroneous; therefore, the previous Restriction is withdrawn.

***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-20 and 31-36, drawn to an apparatus of making a monitor system for a semiconductor, classified in class 324, subclass 765.
  - II. Claims 21-23, drawn to ion implantation system, classified in class 250, subclass 492.21.
  - III. Claims 24-30, drawn to a test wafer, classified in class 257, subclass 48.
  - IV. Claims 37-48, drawn to a monitoring system for semiconductor process, classified in class 438, subclass 5+.
3. The inventions are distinct, each from the other because:
4. Inventions of Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)).

5. Inventions of Group I and Group III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)).

6. Inventions of Group I and Group IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)).

7. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

8. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

9. Because these inventions are distinct for the reasons given above and the search for any one of the groups, is not required for other groups restriction for examination purposes as indicated is proper.

10. A telephone call was made to Mr. Mark A. Superko on June 20, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

11. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

### ***Conclusion***

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Trung Nguyen whose telephone number is 703-305-4925.
